

Origami Bookmark

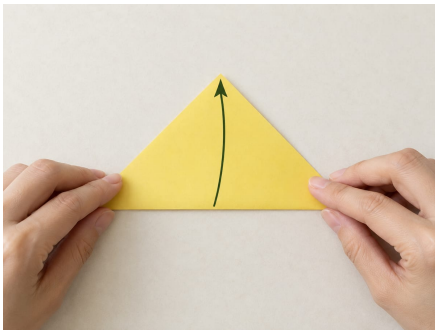

7 steps | About 4 min | Beginner | Updated 2026-10-28

Make an origami bookmark that slips over a page corner without glue. A square sticky note is enough for a small pocket, while a larger square of printer or notebook paper gives you more room to fold. Keep the sticky edge facing inward if you use a note. The two side corners tuck into the front pocket to hold the shape.

Materials: One square of paper or a square sticky note; A book for trying the finished corner pocket.

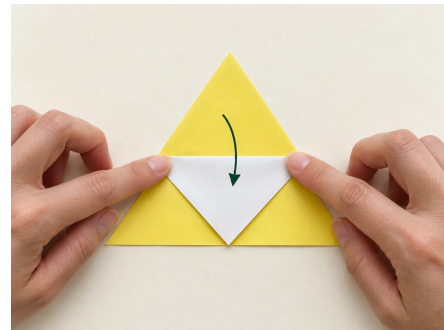

01 Fold the triangle

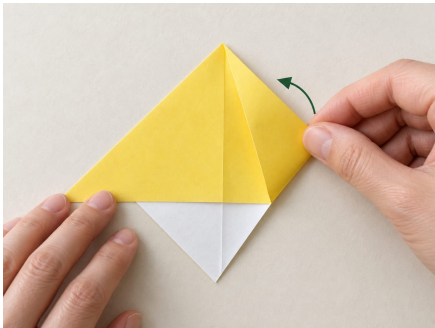

Place the square as a diamond; bring the bottom corner to the top corner and crease.

02 Open the pocket front

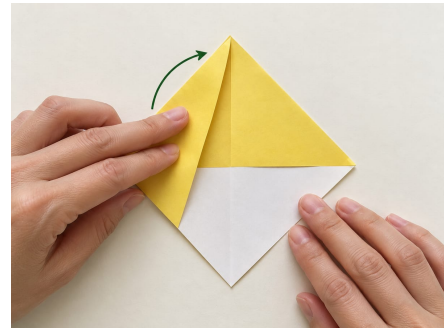

Fold only the top front corner down to the midpoint of the bottom edge.

03 Mark the right side

Fold the right corner up to the top point, crease, then return it to the right.

04 Mark the left side

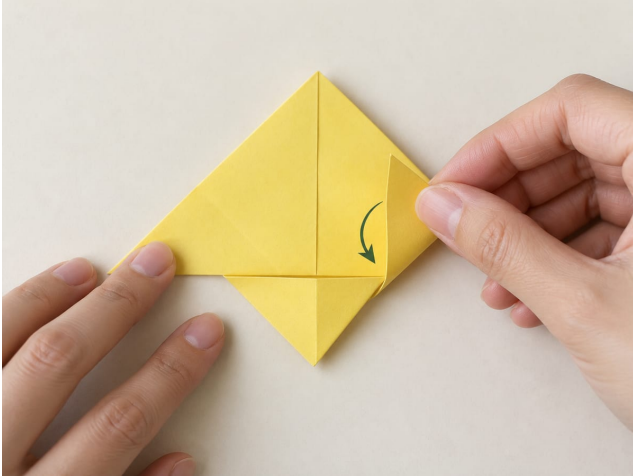

Fold the left corner up to the top point, crease, then return it to the left.

Keep the pictures in order. Steps 5-7 continue the same model.

05 Tuck the right corner

Lift the right corner along its crease and tuck its tip behind the folded front flap.

06 Tuck the left corner

Lift and tuck the left corner into the same pocket, keeping the outer edges aligned.

07 Try the pocket

Flatten the pocket and slip it over a page corner, keeping the paper clear of the text.
